

**Jeppesen NavData® 2513 Modified Data Report***Effective 25 Dec 2025*

Jeppesen plays the role of a value added data consolidator when combining source documentation from over 200 countries worldwide. Occasionally inconsistencies or errors are detected within the source documents provided by the state(s). Jeppesen corrects these errors or inconsistencies whenever possible by modifying the state provided data.

Jeppesen is required by regulatory agencies to report Jeppesen Modified Data to our end users. The listing of Jeppesen Modified Data is provided below. All data modified by Jeppesen should be considered fit for aeronautical use.

**No Records to report**

Please ensure this information is available for end use customers.
