Doc. No.: Navigation Database Information Letter 24-03
Date: July 23, 2024

Notice of Change to 1350-E5 (SET): Increase in Number of Disks

Effective Date

Cycle 2408, effective 08-August-2024

Description

As of Cycle 2408, the database disk set for part number 1350-E5 (Set), CAN-EUR-USA, includes an additional "standard" floppy disk. This database set now contains a total of four disks: 1350-E5-S1, 1350-E5-S2, 1350-E5-E1, and 1350-E5-E2.

When downloading databases from UniNet and when loading them into the Flight Management System, all four disks must be loaded to complete the navigation database update.

Upgrade Offer

Eliminate the need to use multiple floppy disks for database loading by upgrading your Universal FMS to a new SBAS FMS. This will mitigate database limitations and service issues for the future so that you can fly anytime, anywhere without restrictions.

For a limited time, loyal customers can take 25% off a new SBAS FMS. Contact us to learn more.
