

## Navigation Database Information Letter 25-05

Doc. No.: Navigation Database Information Letter 25-05

Date: September 22, 2025

### **Discontinuation of 1350-E5 (SET) and 604-E5 Database**

#### **Applicable Database Part Numbers**

FMS Database Part Numbers Affected (FMS SCN 601.X/701.X through 604.X/704.X):

- 1350-E5 (SET), 604-E5: United States, Europe, Canada

#### **Discontinuation Date**

1 October 2025

#### **Description**

The volume of electronic navigation data continues to grow at an exponential rate. The FMS memory limits have now been exceeded for database part numbers 1350-E5 (SET) and 604-E5 which has led to their discontinuation at the conclusion of cycle 2509, expiring 1 October 2025.

Alternate database part numbers are available to cover the impacted regions of Europe, Canada, and United States. Using these alternate database part numbers, operators will need to stop in Canada to switch databases for transatlantic flights between United States and Europe.

At no additional cost, and no action required on your part, the following two alternate database part numbers will be added if not already active on your account:

- 604-B4 and 1350-B4 (SET) covering 4000' runways in Canada, Eastern Europe, and Pacific
- 604-G4 and 1350-G4 (SET) covering 4000' runways in Canada, Latin America, and United States.

#### **Contact**

Due to equipment age, database constraints and part obsolescence Universal Avionics strongly encourages operators to work with our Sales team and Authorized Dealer Network on a path to upgrade your FMS equipment.
